

PRDS entry guide: the solution to guide sections with open passes.

PRDS
GUIDE SERIES
>profile roller
guide<

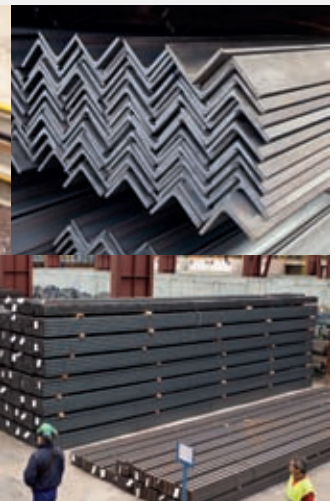

**Reduced investment
on rolls thanks to
the use of open passes.**

Guide features

- > Process reliability granted with open passes rolling sequence.
- > Bottom roller with eccentric to perfectly fill the top roll groove.
- > 4 side rollers for guiding with single-point adjustment.
- > Movable base to get closer to the rolling cylinder to balance the redressing.

- > Internal interchangeable wear inserts to protect the guide.
- > Minimized spare parts and maintenance.
- > Suitable for both grease and air/oil lubrication systems.
- > Flexibility to cover different stock dimensions thanks to simple side spacers.
- > Side noses to adapt to different roll diameters.
- > Compact, simple and heavy-duty design.
