Guide features

- > Precise guiding of rolled stock, achieving very strict product tolerance and superior surface quality.
- > Single-point adjustment for symmetrical and simultaneous regulation of the roller centre distance.
- > Independent roller holder adjustment.
- > Version with independent vertical roller adjustment for outstanding control or version with locked roller holders for outstanding rigidity.
- > Utilization of common components to reduce the spare parts stock.
- > Possibility to install remote control.

- > Minimised spare parts and maintenance.
- > Suitable for both grease and air/oil lubrication systems.
- > Easy, quick and reliable mounting by means of fixed bases or cassettes.
- > Long-time intervals before maintenance activities, granting long operational time.
- > Media supply through quick changing hoses or directly through the base.
- > Availability of mechanical, optical or Hiline tool for guide setting.
- > Easy on-line adjustment thanks to 30° setting screws.
- > Optimized box design to increase life time.
- > Completely interchangeable with 1000 series.

1100 Series SR guides: the new standard for guiding on bar and rod mills.
